### To whom it may concern

In order to coordinate the activities in various export markets, Eternit last summer registered the new international trademark "Swisspearl ®" for façade sheets, marketed so far as "Pelicolor ®" range.

No changes whatsoever have been made in the composition and/or production process for these façade panels.

As most official tests have been done before the Name "Swisspearl ®" was introduced many certificates refer to "Pelicolor ® Natura/Tectura/Carat/Xpressiv" instead of "Swisspearl ® Natura/Tectura/Carat/Xpressiv". Future tests will automatically be filed in with the new brand.
